

Practical skills, in person, from local Experts.

A marketplace for practical, in-person sessions with ID-verified Experts, always in a public place.

THE GAP

The know-how people need sits with practitioners, and there is no simple, safe way to reach them.

Interview tomorrow

No one to rehearse with who has actually hired for the role.

New in a city

Paperwork, transport and local systems, with no one to ask.

A deck, a CV, a language

One honest hour with someone who does it every day.

WHAT TIMEFOLK IS

A marketplace for practical, in-person sessions with local Experts.

Skill first

Clients start from a skill, not a profile: interview practice, languages, newcomer help, SI for work, CV and pitch feedback.

Always in public

Cafés, libraries, parks, malls. Never a bar, club, home, hotel room or vehicle.

Three roles

Clients schedule. Experts offer sessions in the skills they list. Folk join a session as a trusted person.

HOW A SESSION WORKS

Four steps, every one clear before anyone pays.

- 1. Choose a skill and an Expert.** Profession, years of experience, reviews, ID-verified seal.
- 2. Pick a public place, a time and a length.** 30 minutes to 6 hours, fixed session fee shown first.
- 3. Schedule and pay in the app.** The Expert confirms within 15 minutes, or you can cancel for a full refund.
- 4. Start the session with a QR or a code.** Then both leave a review.

SAFETY AND TRUST

Built in, not bolted on.

ID check for everyone. Government ID and liveness through Didit.

Contact guard. Phone numbers, emails, handles and links blocked in every message.

Approximate location only. Exact place shown to the two people in the session.

Start with a QR or code. A rotating QR that changes every 30 seconds.

Report and block. On every profile, review, event and message; a person reviews each report.

Photos checked. Every picture and video screened before it appears.

FOLK

A trusted, ID-verified person who joins a session, like going out with an elder.

Timefolk assigns

Clients never browse or pick by photo. Details show only once confirmed.

Same gender, if available

A safety preference from the ID check; gender is never shown.

Present only

No security role, no licence, never scheduled alone. Written against UAE law.

PAYMENTS

Experts keep 80%. Timefolk never holds the money itself.

Piece	How it works
Clients pay	Apple Pay, Google Pay or a saved card through Stripe, in the app
Experts are paid	Stripe Connect payouts or a bank account added in the app, with "Get paid now" instant payouts to a debit card
Groups	Each member pays a held share; charged only when everyone has paid
Memberships	Plus for Clients, Pro for Experts, through Apple and Google in-app purchase

THE APPS

iPhone, iPad, Android and the web, in eight languages.

SI search. Ask in your own words; it finds the right Expert.

Spoken moments. Session start, end and event welcome, voiced in 8 languages.

Expert quick setup. Live in one message, skills drawn from the profession.

Events and groups. Small-group sessions, split payments, share QR codes.

Session messages. Ask a question first; text only, contact guard on.

SI assistants. Find Experts from ChatGPT, Claude and Gemini.

EVENTS

Small-group sessions an Expert runs for a few people at once.

- 1. Find it in Explore.** Date, skill, fixed session fee, city and spots left on every card.
- 2. Join and pay in the app.** Apple Pay, Google Pay or a saved card. Only ID-verified members can join.
- 3. Get the exact place 24 hours before.** Always a public place, never a home, bar or private room.
- 4. Start with the event code or QR.** A spoken welcome in 8 languages, then only those who came can review.

EVENT FEATURES

One hour of an Expert's time, shared by a few people, with the same safety as a 1:1 session.

For Clients

A lower session fee per person and a few others to practise with.

Full refund if the event is cancelled or you leave 24 hours or more before it starts.

If the time or place changes, 48 hours to leave for free.

For Experts

More earned from one hour, with spots and the session fee set by the Expert.

A promotion kit: an event page and a QR picture to share anywhere.

A "Who came" list, a scan for members' QR and one change of time or place.

For Timefolk

Several fees from one hour, and new members who arrive through a shared event.

Pictures and descriptions are scanned automatically; a person reviews every report.

An Event manager in the console to review or cancel any event.

WHERE TO GET TIMEFOLK

Native apps on every main device, one account across all of them.

iPhone and iPad

App Store, built in Swift, Apple Pay, voices and QR start.

Android

Google Play, phones and tablets, Google Pay, in-app Google sign-in.

Web

timefolk.com on desktop and phone, the same screens as the apps.

AI assistants

ChatGPT, Claude and Gemini, through Timefolk's own server.

Sign in with email, phone, Apple or Google. Eight languages, light and dark, and large-text ready.

BUILT IN-HOUSE

Engagement and attribution, built into Timefolk itself.

Engagement

Journeys that react to what members do, push and email campaigns in the house template, in-app cards, audiences by city, role and score, quiet hours and frequency caps.

Attribution

Install attribution and SKAdNetwork, ad spend from Apple Search Ads and Google, cost per session, uninstalls and retention by install week.

No marketing or tracking SDKs in the apps, and no member data sent to marketing vendors.

No per-user fees that grow with the member base.

Member data stays in one place, owned by Timefolk.

SI ASSISTANTS

Ask ChatGPT, Claude or Gemini, and Timefolk answers with real Experts.

ChatGPT

Timefolk plugin on our own MCP server: search skills and Experts in a city.

Claude

Timefolk connector, submitted to the Claude connectors directory.

Gemini

A shared Timefolk Gem that finds Experts and links to schedule.

Inside the apps, SI search reads a request in your own words and returns matching Experts, with the contact guard on.

SUPPORT

Help inside the app, decided fast, with a person for anything unclear.

Tickets from Help

A session, a payment, an account: members write to us with photos and screenshots, and hear back in the app, by push and by email.

"I feel unsafe"

Pauses the session at once. Money waits on proof: rules first, then SI review, then a person for what is still unclear.

Operations agent

Reads every open case and decides the routine ones with a written reason; safety, reports and appeals always go to a person.

Stuck-member help

Anyone stuck at sign-up, the ID check or their profile gets one clear nudge for exactly that step.

Privacy in support

SI sees a case's kind and age, never a name, phone, email or photo. Alerts carry counts only.

Reach us

hello@timefolk.com, the in-app Help screen, and a weekly report of what still needed a person.

WHERE TIMEFOLK IS

Built for the world, starting city by city.

120

countries where payments
work

8

languages across apps and
web

80

practical skills in the
catalogue

2

launch markets: Dubai and
India

Experts first in each city, then Clients. A waitlist tells people when Experts arrive near them.

Find the Expert who has done
it before, and schedule a
session.
